Description

The Lumencove XT Direct View Colour Changing is a system of direct view linear LED luminaires for media façades and delineation of large-scale structures such as bridges and towers. IP66-rated for sustained outdoor use, Lumencove XT Colour Changing luminaires can be arranged in patterns or in long continuous lines of light. The luminaires use tri-colour LEDs in a single package, premixing colours to avoid striations and shadows. A domed acrylic diffuser lens produces perfectly uniform and saturated light that can be controlled with up to 305 mm resolution for sophisticated low-resolution video effects in colour. Available with a choice of lengths, finishes, and mounting options, as well as Legacy or Custom output modes.
